Fast-learning, detail-driven Computer Scientist who thrives in collaborative environments. Meticulous in execution and calm under pressure, with a proven ability to adapt quickly across domains. Consistently delivers reliable, high-quality results without needing to be micromanaged. Completely ready to hit the ground running.

PROFESSIONAL EXPERIENCE

Junior Software Developer | Normex | Gatineau, QC | September 2025 - Present

- Designed and shipped frontend features that improved usability and accessibility for end users across food and manufacturing organizations
- Owned the full bug triage lifecycle; intake, prioritization, assignment, and resolution tracking — reducing response time and strengthening cross-team communication
- Contributed to the development and maintenance of a web-based compliance and quality management platform serving industrial clients
- Participated in code reviews, debugging, and testing to uphold reliability, performance, and long-term maintainability
- Authored documentation and user-facing guides to support both internal teams and external clients

Fundraiser | Fundraising Direct | Montreal, QC | May 2024 - August 2025

- Applied persuasive communication and negotiation skills to consistently meet and exceed fundraising targets
- Navigated complex donor conversations with professionalism, demonstrating strong interpersonal and conflict-resolution abilities

PROJECTS

Portfolio Website | Personal Project | [Portfolio](#)

Modern responsive portfolio built with Next.js, TypeScript, and Framer Motion. Features interactive 3D backgrounds, smooth animations, and a fully functional contact form to showcase my skills.

AffirmBot | AI Chatbot | affirmbot.onrender.com

Built and deployed a conversational chatbot using Python that analyzes user input and delivers context-aware personalized affirmations through intelligent intent recognition and response mapping. Developed a responsive frontend using Flask, HTML, CSS and JavaScript to provide a seamless user-facing interface.

Rentify | Full Stack Project | [GitHub](#)

A group project designed to connect renters with lessors, enabling users to list, request, and manage item rentals seamlessly. With dedicated functionalities for renters and lessors, the platform offers an efficient and user-friendly rental experience.

Environmental Monitoring System | IoT Group Project | [GitHub](#)

Engineered an IoT system to monitor critical environmental conditions (temperature, humidity, and CO2 levels) in data centers, with automated real-time alerts triggered when thresholds are exceeded.

SKILLS

Programming Languages: Python, Java, C/C++, C#, Javascript, Typescript, SQL, HTML, CSS, PHP

Frameworks: React, Express, TensorFlow, Laravel, Pytorch

IT & Systems: Ticketing workflows (Notion, Jira), Active Directory, Windows Server

Tools: DialogFlow, Git, GitHub, Android Studio, VS Code, Microsoft Office Suite (Word, Excel, PowerPoint)

Languages: English(Native), French(Native)

EDUCATION

Honours B.S.A in Computer Science - University of Ottawa | January 2023 - April 2026 (Expected)

Transferred from Biomedical Sciences to pursue a passion for Computer Science.
